

easycraft **ZERO WASTE**

RETHINK • REDUCE • RECYCLE

The Easycraft **ZERO WASTE** program will deliver a real reduction of the waste being generated from Wall and Ceiling offcut material across **large residential and commercial projects**.

Imagine being able to have product delivered to your project when you want it, cut to suit your specific project requirements, in quantities that you have predetermined to be most efficient for your site and installers.

We know when using easycraft products to replace traditional wall & ceiling materials (plasterboard & fibre cement) it results in an easier, quicker installation with less trades onsite.

Step 1

specify
easycraft
linings

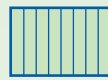

Step 2

develop &
manufacture
samples

Step 3

manufacture
easycraft panels to
specification

Step 4

deliver to site
ready for
installation

RETHINK

An innovative program designed to assist in managing your projects from a time and cost saving perspective, all while supporting waste reduction, recycling and contributing to a greener and healthier environment.

- > Order what you want, when you want it.
- > Product arrives on-site, pre-cut, primed and ready for installation.
- > Promote your project site as supporting zero waste.

REDUCE

The Zero Waste program will substantially reduce your onsite waste, with labour reduction across installation & finishing.

- > Reduced cutting and onsite waste.
- > Reduced installation time from the easyjoin hidden joining system.
- > Reduced finishing time with boards delivered pre-primed.

RECYCLE

Easycraft have developed a complete 360° recycling program.

- > Dust waste created during our manufacturing process is recycled to produce fuel to manufacture base board.
- > Using 100% Australian sourced timbers, with product made and manufactured in Australia.
- > Sustainably sourced having Green Tag and CoC certification.
