Pre-finished Linings

Convex in Boston Oak™

Introducing
Ikara
Pre-finished Linings

To develop our latest range of lining board profiles, the team at easycraft have partnered with **polytec**, the market leaders in decorative finishes. Together, easycraft and **polytec** have combined easycraft's experience in wall linings with **polytec**'s range of popular Woodmatt® finishes to create the Ikara range.

Ikara reinterprets classic panelling for contemporary spaces. Manufactured from high-quality, moisture-resistant MDF, each board features a concealed tongue-and-groove join to achieve a seamless, sophisticated finish. Designed for both residential and commercial applications, Ikara delivers a balance of architectural form and practical performance.

Ikara expands the creative possibilities of interior specification. By combining easycraft's expertise in architectural wall linings with **polytec**'s renowned decorative timber grain colours and finishes, the partnership enables a cohesive material palette across walls and joinery.

The result is a considered, design-led solution that allows architects and designers to specify coordinated surfaces with confidence, achieving unified interiors defined by consistency in colour, texture and finish.
